Examiner 3

NEXT GENERATION PROCESSING AND ANALYSIS OF 3D GPR DATA

Examiner™ 3 is the new generation of 3D-Radar’s revolutionary software and a further development based on the success of Examiner™ 2.

Increase your productivity
With Examiner™ 3 it has become even easier to process, analyze and inspect data from 3D-Radar Ground Penetrating Radar systems. Examiner™ is designed and optimized to handle vast amounts of high resolution data on normal PCs, and sets a new standard for speed and ease of use.

3D-Radar’s Examiner™ has been successfully deployed in diverse applications such as road and bridge inspection, utility mapping, mining and archaeology.
